

**QUANTCYCLES**

**BONDS**

**OPPORTUNITIES & EXTREMES**

# About This Document

- This document contains two cyclical market patterns based on the QuantCycles Cycle Analysis Software
- **Cycle Continuation Opportunity** – These are defined as a deviation of the forecast direction that extend to the upper or lower extremes. There is a high probability that the market will return to the forecast direction within a projected time frame. A Dual Opportunity has a higher probability of returning to the forecast direction than a Single Opportunity.
  - Always look for market commonality. For example, if you're looking at a DOW30 stock to buy, does the index look positive as well?
  - As the market approaches the cycle forecast turning point, the probability of the market following that direction decays. This is indicated by the "Cycle Percent Complete" note at the top of the chart, as well as predicted duration dates
  - At an Opportunity, a strong market may continue to go against the forecast trend, therefore, we recommend waiting for confirmation of the turning point before acting on it.
  - If the Market has not returned to the direction of the cycle by the minimum expected cycle duration date, consider the cycle incorrect.
- **Cycle Extreme** – These are defined as a deviation of the forecast direction, but with a lessor probability of return to the forecast direction. A Dual Extreme is a stronger Support / Resistance than a Single Extreme.
  - The Cycle Continuation Opportunity information above applies here as well, but can be utilized more to take profits than to consider for entry
  - Indicates that a market is at or near a Cycle Support or Resistance.
  - There is a high probability of a market stall.

# Analysis Overview

- 2 Dual Extremes
- 4 Single Extremes

# Cycle Extremes

## 2 Dual Extremes

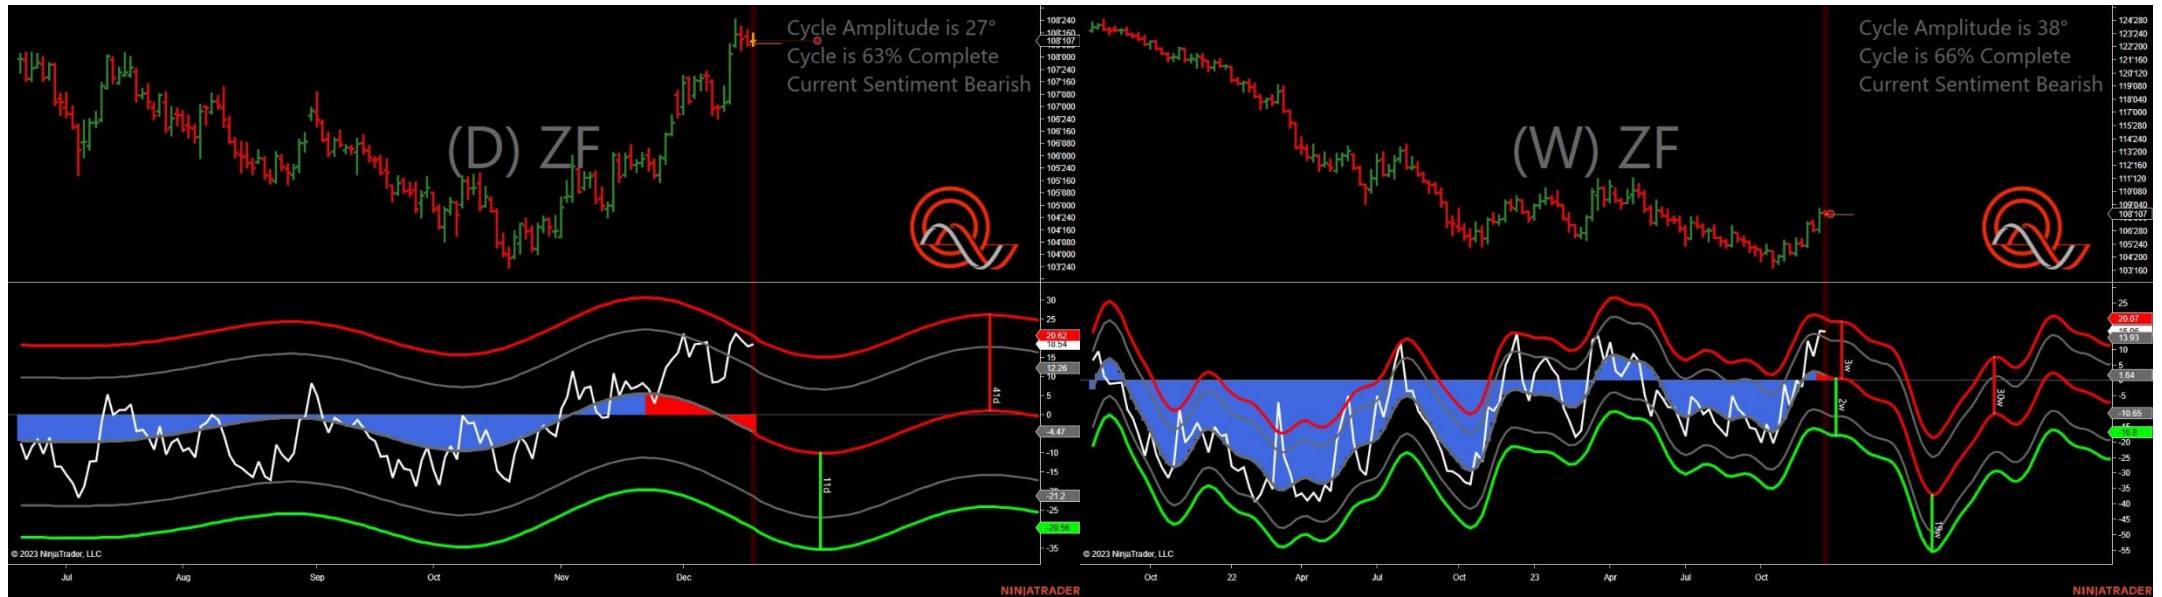

- ZF - 5-Year Treasury Note Futures
- ZN - 10-Year Yield Index

## 4 Single Extremes

- ZB - 30-Year Bond Futures
- ^FVX - 5-Year Treasury Note Yield Index
- ^TNX - 10-Yield Year Index
- ^TYX - 30-Yield Year Index

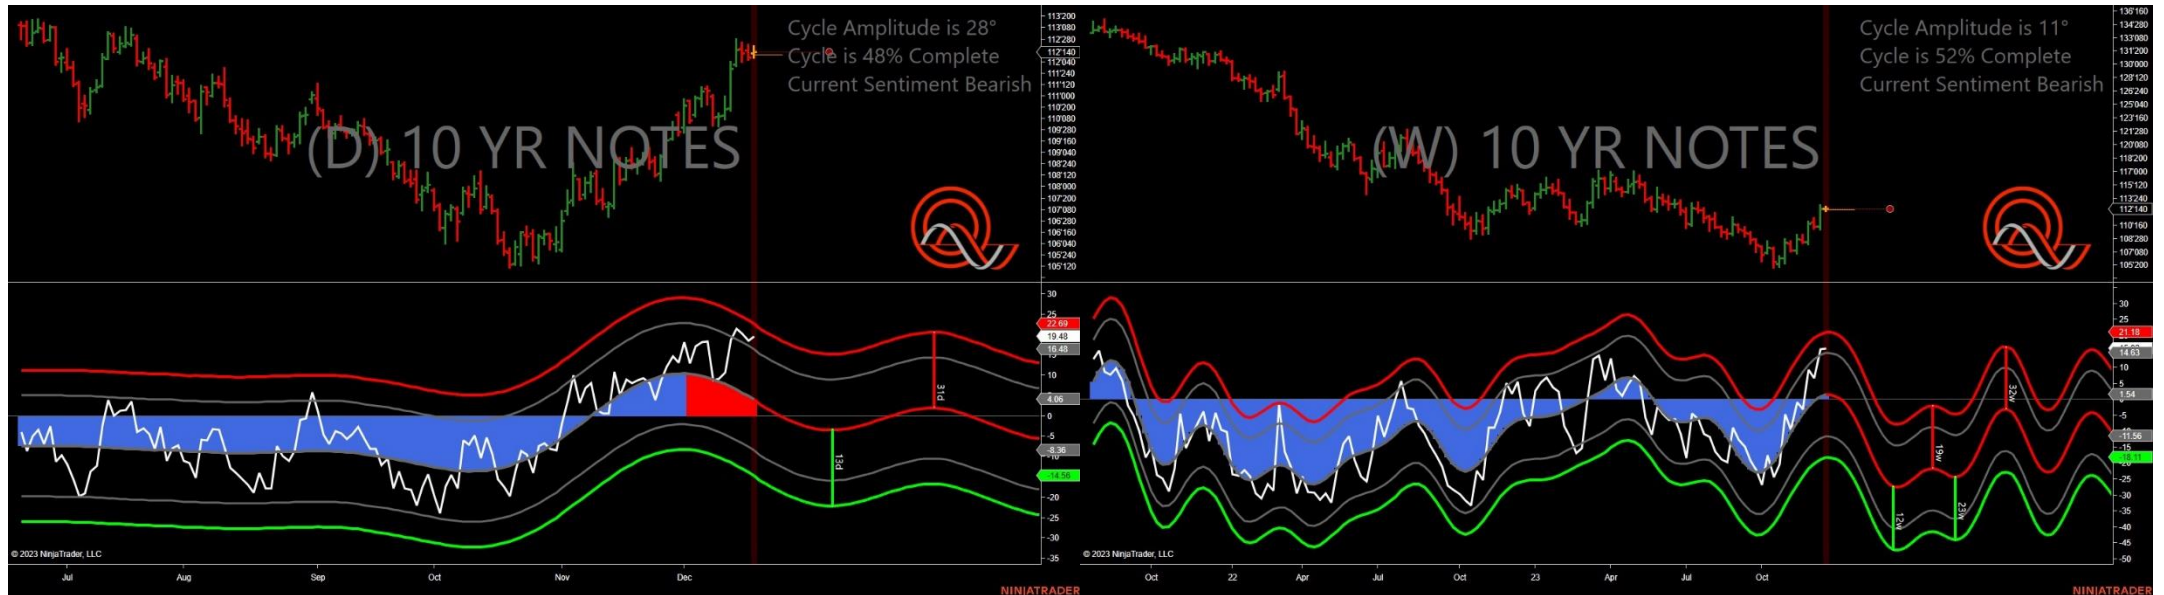

# 5-Year Treasury Note Futures - Dual Extreme

- Amplitude is 27° - Good
- Direction Accuracy is 43%
- Market is at Resistance Extreme - Expect market consolidation Between \$108.484375 and \$108.3359375

# 10-Year Yield Index - Dual Extreme

- Amplitude is 28° - Good
- Direction Accuracy is 21.5%
- Market is at Resistance Extreme - Expect market consolidation Between \$112.640625 and \$112.4375

# 30-Year Bond Futures - Single Daily Extreme

- Amplitude is 53° - Strong
- Direction Accuracy is 35.5%
- Market is at Resistance Extreme - Expect market consolidation Between \$124.15625 and \$123.65625

# 5-Year Treasury Note Yield Index - Single Daily Extreme

- Amplitude is 47° - Strong
- Direction Accuracy is 19%
- Market is at Support Extreme - Expect market consolidation Between \$39 and \$39

# 10-Yield Year Index - Single Weekly Extreme

- Amplitude is 20° - Weak
- Direction Accuracy is 25%
- Market is at Support Extreme - Expect market consolidation Between \$38.97 and \$38.96

# 30-Yield Year Index - Single Weekly Extreme

- Amplitude is 17° - Weak
- Direction Accuracy is 6%
- Market is at Support Extreme - Expect market consolidation Between \$40.1 and \$40.09
